Technology in the commercial environment today does far more than phone, fax, and email. It helps you *communicate, streamline, and train all while improving the bottom line*. Doug Ward Integration offers an array of services that can make your business more visible, efficient and in turn, save you money.

For example, our digital signage products allow you to deliver dynamic, interactive content that can be managed onsite or from a remote location. Whether a retail or corporate application, digital signage allows you to clearly communicate your message to your customers and staff.

Video conferencing technology has changed the way we do business. While there are times when only a face to face will do, a well equipped board can dramatically reduce travel expenses while boosting efficiency.

Going Green. Far more than a catch phrase, using less energy can have a significant impact on your profits. Automated technology can monitor and control all energy usage within your facility by scheduling events, maximizing daylight harvesting, and load shedding.

Integrated systems provide the flexibility to grow and change with your needs. By controlling sub systems like audio, video, lighting, digital signage, window coverings, hvac, security and more, they all become easier to manage while helping to control energy costs.

We can't control your business, but we can control the technology.

What our clients are saying

"Our new board room allows us to deliver high quality presentations to our customer without having to leave the office. It's just smart business."

**-Phil Davis
CEO, Design 9**

"Our digital signage project has been a tremendous success. We are getting more business from our current customers by cross selling services they did not even know we offered."

**-Mike Hinsley
First Federal Bank**

LIFE. AUTOMATED.

From the President

Hello, I am Doug Ward President and CEO of Doug Ward Integration. I would like to thank you for taking the time to learn more about the services that we offer. Technology enhances each of our lives on a daily basis. It helps businesses be more productive, efficient, and profitable.

For us, it is very rewarding to take a clients wants and needs, and combine them with our passion and imagination, and then deliver a product that helps their business thrive.

Since 1998 we have had the privilege of providing hi end technology services for commercial applications in both the new construction and retro fit market throughout the southeast region.

So whether you are considering integrating your entire campus or a single boardroom, I would love the opportunity to show you how you can live Life. Automated.

WE WILL:

- Listen to your individual needs and preferences!
- Design a system that will meet your high expectations!
- Deliver a "Best in Class" product and experience!
- Do what we say we will do, when we say we will do it!
- Not compromise on integrity or quality!
- Be deserving of your recommendation of our company!
